PW OR DW PACKAGE

SLLS659A-MAY 2006-REVISED APRIL 2007

### **FEATURES**

- V<sub>L</sub> Pin for Compatibility With Mixed-Voltage Systems Down to 1.8 V on Logic Side
- Enhanced ESD Protection on RIN Inputs and DOUT Outputs
  - ±15-kV Human-Body Model
  - ±15-kV IEC 61000-4-2, Air-Gap Discharge
  - ±8-kV IEC 61000-4-2, Contact Discharge
- Low 300-μA Supply Current
- Specified 250-kbps Data Rate
- 1-μA Low-Power Shutdown
- Meets EIA/TIA-232 Specifications Down to 3 V

### **APPLICATIONS**

- Hand-Held Equipment
- PDAs
- Cell Phones
- Battery-Powered Equipment
- Data Cables

### **DESCRIPTION/ORDERING INFORMATION**

The MAX3386E is a three-driver and two-receiver RS-232 interface device, with split supply pins for mixed-signal operations. All RS-232 inputs and outputs are protected to  $\pm 15$  kV using the IEC 61000-4-2 Air-Gap Discharge method,  $\pm 8$  kV using the IEC 61000-4-2 Contact Discharge method, and  $\pm 15$  kV using the Human-Body Model.

The charge pump requires only four small  $0.1-\mu F$  capacitors for operation from a 3.3-V supply. The MAX3386E is capable of running at data rates up to 250 kbps, while maintaining RS-232-compliant output levels.

The MAX3386E has a unique  $V_L$  pin that allows operation in mixed-logic voltage systems. Both driver in (DIN) and receiver out (ROUT) logic levels are pin programmable through the  $V_L$  pin. The MAX3386E is available in a space-saving thin shrink small-outline package (TSSOP).

### ORDERING INFORMATION

| T <sub>A</sub> | PACKAGE <sup>(1)(2)</sup> | ORDERABLE PART NUMBER | TOP-SIDE MARKING |
|----------------|---------------------------|-----------------------|------------------|
| 0°C to 70°C    | TSSOP - PW                | MAX3386ECPWR          | MP386EC          |
| 0°C to 70°C    | SOIC - DW                 | MAX3386ECDW           | MAX3386EC        |
| 40°C to 95°C   | TSSOP - PW                | MAX3386EIPWR          | MP386EI          |
| –40°C to 85°C  | SOIC - DW                 | MAX3386EIDW           | MAX3386EI        |

<sup>(1)</sup> Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

### TRUTH TABLE (SHUTDOWN FUNCTION)

| PWRDWN | DRIVER<br>OUTPUTS | RECEIVER OUTPUTS | CHARGE PUMP |
|--------|-------------------|------------------|-------------|
| L      | High-Z            | High-Z           | Inactive    |
| Н      | Active            | Active           | Active      |

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

<sup>(2)</sup> For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.

# **FUNCTIONAL BLOCK DIAGRAM**

<sup>(1)</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

### **ESD Protection**

| PARAMETER | TEST CONDITIONS                 | TYP | UNIT |
|-----------|---------------------------------|-----|------|
|           | Human-Body Model                | ±15 |      |
| RIN, DOUT | IEC 61000-4-2 Air-Gap Discharge | ±15 | kV   |
|           | IEC 61000-4-2 Contact Discharge | ±8  |      |

<sup>(1)</sup> Typical values are at  $V_{CC} = V_L = 3.3 \text{ V}$ ,  $T_A = 25^{\circ}\text{C}$ . (2) Driver skew is measured at the driver zero crosspoint.

### **APPLICATION INFORMATION**

### PARAMETER MEASUREMENT INFORMATION

NOTES: A. C<sub>L</sub> includes probe and jig capacitance.

B. The pulse generator has the following characteristics: PRR = 250 kbit/s,  $Z_O = 50 \Omega$ , 50% duty cycle,  $t_r \le 10$  ns,  $t_f \le 10$  ns.

Figure 1. Driver Slew Rate

NOTES: A. C<sub>L</sub> includes probe and jig capacitance.

B. The pulse generator has the following characteristics: PRR = 250 kbit/s,  $Z_{O}$  = 50  $\Omega$ , 50% duty cycle,  $t_{f}$   $\leq$  10 ns,  $t_{f}$   $\leq$  10 ns.

Figure 2. Driver Pulse Skew

NOTES: A. C<sub>L</sub> includes probe and jig capacitance.

B. The pulse generator has the following characteristics:  $Z_{\Omega} = 50 \Omega$ , 50% duty cycle,  $t_r \le 10$  ns.  $t_f \le 10$  ns.

Figure 3. Receiver Propagation Delay Times

### PARAMETER MEASUREMENT INFORMATION

NOTES: A.  $C_L$  includes probe and jig capacitance.

B. The pulse generator has the following characteristics:  $Z_0 = 50 \ \Omega$ , 50% duty cycle,  $t_f \le 10 \ ns$ .

<sup>&</sup>lt;sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free** (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

<sup>(2)</sup> Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <a href="http://www.ti.com/productcontent">http://www.ti.com/productcontent</a> for the latest availability information and additional product content details.

### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
