

4A High Efficiency Switching Regulators

FEATURES

- Wide Input Voltage Range 3.5V to 30V
- Low Quiescent Current: 7mA
- Internal 4A Switch
- Very Few External Parts Required
- Self Protected Against Overloads
- Shutdown Mode Draws Only 100µA Supply Current
- Flyback Regulated Mode Has Fully Floating Outputs
- Comes in Standard 5-Pin Package
- Can Be Externally Synchronized (See LT1072 Data Sheet)

APPLICATIONS

- Boost Converter
- High Efficiency Buck Converter
- PC Power Supply with Multiple Outputs
- Battery Up-Converter
- Negative-to-Positive Converter

USER NOTE:

This data sheet is only intended to provide specifications, graphs, and a general functional description of the LT1271/LT1269. Application circuits are included to show the capability of the LT1271/LT1269. A complete design manual (AN-19) should be obtained to assist in developing new designs. This manual contains a comprehensive discussion of both the LT1070 and the external components used with it, as well as complete formulas for calculating the values of these components. The manual can also be used for the LT1271/LT1269 by factoring in the higher switch current rating and higher operating frequency.

DESCRIPTION

The LT[®]1271 and LT1269 are monolithic high power switching regulators. Identical to the popular LT1070, except for switching frequency (LT1271 = 60kHz, LT1269 = 100kHz) and slightly lower switch current, they can be operated in all standard switching configurations including buck, boost, flyback and inverting. A high current, high efficiency switch is included on the die along with all oscillator, control and protection circuitry. Integration of all functions allows the LT1271/LT1269 to be built in a standard TO-220 power package. This makes them extremely easy to use and provides “bust proof” operation similar to that obtained with 3-pin linear regulators.

The LT1271/LT1269 operate with supply voltages from 3.5V to 30V, and draw only 7mA quiescent current. By utilizing current mode switching techniques, they provide excellent AC and DC load and line regulation.

A patented adaptive antisat switch drive allows very wide ranging load currents with no loss in efficiency. An externally activated shutdown mode reduces total supply current to 100µA typical for standby operation.

LT, LTC and LT are registered trademarks of Linear Technology Corporation. Burst Mode is a trademark of Linear Technology Corporation.

TYPICAL APPLICATION

High Efficiency 5V Regulator with Burst Mode™ Operation

Maximum Output Power

BUCK MODE OUTPUT POWER ≈ (3.5A)(V_{OUT})

†TRANSFORMER TURNS RATIO MUST BE OPTIMUM TO ACHIEVE FULL POWER.

ABSOLUTE MAXIMUM RATINGS

| | | | |
|---|----------------|---|--------------|
| Supply Voltage | 30V | Operating Junction Temperature Range | |
| Switch Output Voltage | 60V | Operating | 0°C to 100°C |
| Feedback Pin Voltage (Transient, 1ms) | ±15V | Short Circuit | 0°C to 125°C |
| Storage Temperature Range | -65°C to 150°C | Lead Temperature (Soldering, 10 sec.) | 300°C |

The ● denotes the specifications which apply over the full operating temperature range.

Note 1: Measured with V_C in hi clamp, $V_{FB} = 0.8V$.

Note 2: For duty cycles (DC) between 50% and 85%, minimum guaranteed switch current is given by $I_{LIM} = 2.67 (2 - DC)$.

Note 3: Minimum input voltage.

TYPICAL PERFORMANCE CHARACTERISTICS

TYPICAL APPLICATIONS

Negative-to-Positive Buck-Boost Converter

TYPICAL APPLICATIONS

Boost Converter (5V to 12V)

PACKAGE DESCRIPTION Dimensions in inches (millimeters) unless otherwise noted.

Q Package
5-Lead Plastic DD Pak
 (LTC DWG # 05-08-1461)

PACKAGE DESCRIPTION Dimensions in inches (millimeters) unless otherwise noted.

T Package
5-Lead Plastic TO-220 (Standard)
 (LTC DWG # 05-08-1421)

T5 (TO-220) 0398

PACKAGE DESCRIPTION Dimensions in inches (millimeters) unless otherwise noted.

SW Package
20-Lead Plastic Small Outline (Wide 0.300)
 (LTC DWG # 05-08-1620)

NOTE:

1. PIN 1 IDENT, NOTCH ON TOP AND CAVITIES ON THE BOTTOM OF PACKAGES ARE THE MANUFACTURING OPTIONS. THE PART MAY BE SUPPLIED WITH OR WITHOUT ANY OF THE OPTIONS

*DIMENSION DOES NOT INCLUDE MOLD FLASH. MOLD FLASH SHALL NOT EXCEED 0.006" (0.152mm) PER SIDE

**DIMENSION DOES NOT INCLUDE INTERLEAD FLASH. INTERLEAD FLASH SHALL NOT EXCEED 0.010" (0.254mm) PER SIDE

TYPICAL APPLICATION

Negative Buck Converter
