DESCRIPTION

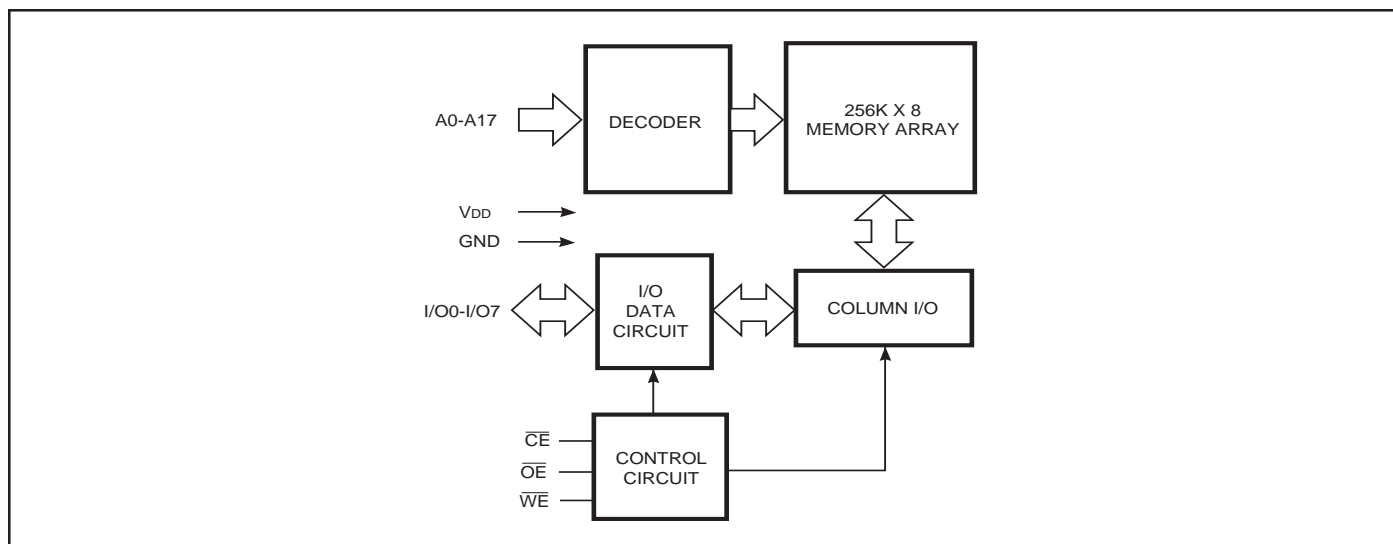

The *ISSI* IS61LV2568L/IS61LV2568LL is a very high-speed, low power, 262,144-word by 8-bit CMOS static RAM. The IS61LV2568L/IS61LV2568LL is fabricated using *ISSI*'s high-performance CMOS technology. This highly reliable process coupled with innovative circuit design techniques, yields higher performance and low power consumption devices.

When \overline{CE} is HIGH (deselected), the device assumes a standby mode at which the power dissipation can be reduced down to 36mW (max.) with CMOS input levels.

The S61LV2568L/IS61LV2568LL operates from a single 3.3V power supply and all inputs are TTL-compatible.

The S61LV2568L/IS61LV2568LL is available in 36-pin 400-mil SOJ, 44-pin TSOP (Type II), and 36-ball mini BGA (6mm x 8mm) packages.
