

# SN74LVC543A OCTAL REGISTERED TRANSCEIVER WITH 3-STATE OUTPUTS

SCAS299H – JANUARY 1993 – REVISED AUGUST 2003

- Operates From 1.65 V to 3.6 V
- Inputs Accept Voltages to 5.5 V
- Max  $t_{pd}$  of 7 ns at 3.3 V
- Typical  $V_{OLP}$  (Output Ground Bounce)  $<0.8$  V at  $V_{CC} = 3.3$  V,  $T_A = 25^\circ\text{C}$
- Typical  $V_{OHV}$  (Output  $V_{OH}$  Undershoot)  $>2$  V at  $V_{CC} = 3.3$  V,  $T_A = 25^\circ\text{C}$
- Supports Mixed-Mode Signal Operation on All Ports (5-V Input/Output Voltage With 3.3-V  $V_{CC}$ )
- $I_{off}$  Supports Partial-Power-Down Mode Operation
- Latch-Up Performance Exceeds 250 mA Per JESD 17

DB, DW, OR PW PACKAGE  
(TOP VIEW)

## description/ordering information

This octal registered transceiver is designed for 1.65-V to 3.6-V  $V_{CC}$  operation.

The SN74LVC543A contains two sets of D-type latches for temporary storage of data flowing in either direction. Separate latch-enable ( $\overline{\text{LEAB}}$  or  $\overline{\text{LEBA}}$ ) and output-enable ( $\overline{\text{OEAB}}$  or  $\overline{\text{OEBA}}$ ) inputs are provided for each register to permit independent control in either direction of data flow.

The A-to-B enable ( $\overline{\text{CEAB}}$ ) input must be low to enter data from A or to output data from B. If  $\overline{\text{CEAB}}$  is low and  $\overline{\text{LEAB}}$  is low, the A-to-B latches are transparent; a subsequent low-to-high transition of  $\overline{\text{LEAB}}$  places the A latches in the storage mode. With  $\overline{\text{CEAB}}$  and  $\overline{\text{OEAB}}$  both low, the 3-state B outputs are active and reflect the data present at the output of the A latches. Data flow for B to A is similar to that of A to B, but uses  $\overline{\text{CEBA}}$ ,  $\overline{\text{LEBA}}$ , and  $\overline{\text{OEBA}}$ .

This device is fully specified for partial-power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

To ensure the high-impedance state during power up or power down,  $\overline{\text{OE}}$  should be tied to  $V_{CC}$  through a pullup resistor; the minimum value of the resistor is determined by the current-sinking capability of the driver.

Inputs can be driven from either 3.3-V or 5-V devices. This feature allows the use of these devices as translators in a mixed 3.3-V/5-V system environment.

## ORDERING INFORMATION

$T_A$	PACKAGE†		ORDERABLE PART NUMBER	TOP-SIDE MARKING
-40°C to 85°C	SOIC – DW	Tube of 25	SN74LVC543ADW	LVC543A
		Reel of 2000	SN74LVC543ADWR	
	SSOP – DB	Reel of 2000	SN74LVC543ADBR	LC543A
		TSSOP – PW	Tube of 60	
	Reel of 2000		SN74LVC543APWR	LC543A
	Reel of 250		SN74LVC543APWT	

† Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at [www.ti.com/sc/package](http://www.ti.com/sc/package).

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SCAS299H – JANUARY 1993 – REVISED AUGUST 2003

## absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

Supply voltage range, $V_{CC}$ .....	–0.5 V to 6.5 V
Input voltage range, $V_I$ : (see Note 1) .....	–0.5 V to 6.5 V
Voltage range applied to any output in the high-impedance or power-off state, $V_O$ (see Note 1) .....	–0.5 V to 6.5 V
Voltage range applied to any output in the high or low state, $V_O$ (see Notes 1 and 2) .....	–0.5 V to $V_{CC} + 0.5$ V
Input clamp current, $I_{IK}$ ( $V_I < 0$ ) .....	–50 mA
Output clamp current, $I_{OK}$ ( $V_O < 0$ ) .....	–50 mA
Continuous output current, $I_O$ .....	±50 mA
Continuous current through $V_{CC}$ or GND .....	±100 mA
Package thermal impedance, $\theta_{JA}$ (see Note 3): DB package .....	63°C/W
DW package .....	46°C/W
PW package .....	88°C/W
Storage temperature range, $T_{stg}$ .....	–65°C to 150°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- NOTES: 1. The input negative-voltage and output voltage ratings may be exceeded if the input and output current ratings are observed.  
 2. The value of  $V_{CC}$  is provided in the recommended operating conditions table.  
 3. The package thermal impedance is calculated in accordance with JESD 51-7.

## recommended operating conditions (see Note 4)

		MIN	MAX	UNIT
$V_{CC}$ Supply voltage	Operating	1.65	3.6	V
	Data retention only	1.5		
$V_{IH}$ High-level input voltage	$V_{CC} = 1.65$ V to 1.95 V	$0.65 \times V_{CC}$		V
	$V_{CC} = 2.3$ V to 2.7 V	1.7		
	$V_{CC} = 2.7$ V to 3.6 V	2		
$V_{IL}$ Low-level input voltage	$V_{CC} = 1.65$ V to 1.95 V		$0.35 \times V_{CC}$	V
	$V_{CC} = 2.3$ V to 2.7 V		0.7	
	$V_{CC} = 2.7$ V to 3.6 V		0.8	
$V_I$ Input voltage		0	5.5	V
$V_O$ Output voltage	High or low state	0	$V_{CC}$	V
	3-state	0	5.5	
$I_{OH}$ High-level output current	$V_{CC} = 1.65$ V		–4	mA
	$V_{CC} = 2.3$ V		–8	
	$V_{CC} = 2.7$ V		–12	
	$V_{CC} = 3$ V		–24	
$I_{OL}$ Low-level output current	$V_{CC} = 1.65$ V		4	mA
	$V_{CC} = 2.3$ V		8	
	$V_{CC} = 2.7$ V		12	
	$V_{CC} = 3$ V		24	
$\Delta t/\Delta v$ Input transition rise or fall rate			10	ns/V
$T_A$ Operating free-air temperature		–40	85	°C

NOTE 4: All unused inputs of the device must be held at  $V_{CC}$  or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
